Dear Sir,

The Directorate of Air Force Health Services is compiling a centralised register of chemical materials in use throughout the Service to provide personnel with a reliable source of information about their transport, storage, use and disposal. The register will also be used by Medical Officers to assess appropriate treatment of members who may be suffering from the effects of occupational exposure.

Items identified in the stock group covering fuels and lubricants are currently under study and Air Force supply records indicate that the following products manufactured or supplied by your company are included in this group:-

Hydraulic Fluid Fire Resistant DMS2014TYIVCL2

Consequently I would be grateful if you could provide this Directorate with data on these products, including chemical composition, storage conditions, shelf lives, safety precautions, fire and explosion properties, first aid and medical treatment in cases of over exposure or accidental poisoning and transport/shipping information, including labelling and IATA requirements. It is particularly important for the complete formulation of each product to be held by this Directorate so that a rapid response is possible in emergency situations.

You are assured that all information provided will be classified as 'Commercial-in-Confidence' and access restricted to members who need the data for official purposes.

Your reply should be sent to:

Directorate General of Air Force Health Services
Campbell Park Offices (CP4-7-05)
CANBERRA ACT 2601

and marked for the attention of DR. B. WARREN (AFMED2C).

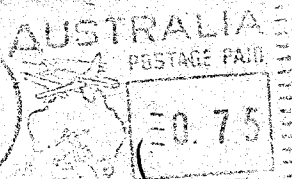

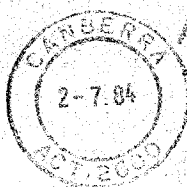

Yours faithfully,

A handwritten signature in dark ink, appearing to read 'B. Warren', with a stylized flourish at the end.

(DR. B. WARREN)
for Director General of
Air Force Health Services

O.H.M.S.
